SECRETARY, BOARD OF
OIL, GAS & MINING

Hello Mr. Seamons,

I have to apologize, I have been at the hospital with my wife since Monday night and when you replied your e-mail went into my junk e-mail folder. I am very sorry about that and I have corrected it.

As far as your question, if you are wanting to drill a water well you have the right to do so. Marion being out there is not a problem. You are the owner of the land (both surface and minerals). The lease that we have does not prevent you in any way to drill a water well.

Again my apologizes in my tardiness in your response.

I wish you a wonderful day and hope you have a great weekend!

Sincerely,

Scott Jacoby

Thank you Mr. Jacoby,

I do have a question for you that I thought about after our talk. As I have told you before, I am planning on retiring on that ground. I am not close enough to retirement to start work on it yet so I have not checked into water. I do not know if there is water from the city out that far or if I will need to put in a well. I know at the site on the other end of town at a family cabin we had to put in a well.

My question then is will this project interfere in any way if we need to drill a well for drinking water?

Thank you in advance for your response and I do look forward to talking with you again.

Jerry Seamons

Good Afternoon Mr. Seamons,

It was a pleasure speaking with you this afternoon and please let me know if you have any further questions.

I hope this e-mail find you well and I look forward to speaking with you in the future!

Best Wishes,

Scott Jacoby
